Key Words: school social work
school social work
university environment
school social work potential

Abstract:

Study presents the character of the potential of school social work in the environment of Slovak schools in theoretical, empirical and applicable level too. Content framework of the first part is made by theoretical and methodological part. The second part consists of research assignment's interpretations. The study brings the results of own empirical research on the possibilities of school social work establishment within Slovak universities conditions. Quantitative methodology and research tool of custom frame – Methodology of School Social Work-1 – has been used within empirical research. The aim of empirical research was to find out the character of school social work potential within the university environment. The main result of the work is the statement that the empirical research achieved the potential of school social work within chosen university environment. University students' problems had been identified and they declared the need of school social worker services as well as his/her function in solving these problems.
