language  
socio-economic inequality  
pluralistic society

**Abstract:**

*Socio-economic disadvantages of national minorities are belonging to key topics of studies of national identity. From attributes by which is defined the relation of national minority and majority in the State language can be considered as a channel, which besides that, it allows communication, it also affects the ability to place at the labor market. The aim of the study is to elaborate a surveillance material about selected approaches for dealing with the problematic of position of national minorities. Head aspect of study of the relation of minorities and the majority to their socio-economic position is their linguistic competence. The logic of the problematic solving is based on the theoretical definition of key terms and their conceptual framework and subsequent application of fundamental starting points in the analytical part. The possible consequences of individual situations in the current socio - economic space are discussed.*
