Document Type: methodological article

Key Words: philosophical basis of research
qualitative, quantitative and mixed approach
strategy and tactics of research
academic and practical science
evidence based practice.

Abstract:

The paper identifies three basic types of social research: quantitative, qualitative and mixed. The choice of type is influenced by several factors. We address some of them. We also point to the need to clearly define the two sides of Social Sciences (academic and practical). We show their specific characteristics and we emphasize the need to develop their interaction on this basis, which provides complexity of professional approach to knowledge and practical problems.
